

Client Profile Reference Sheet

Client Overview

Client Name: Apex Global Investments

Industry: Financial Services

Focus: High-frequency trading and portfolio diversification

Key Objectives:

- Optimize trade execution process for speed and accuracy.
- Mitigate risks associated with manual reconciliation and data handling.
- Align processes with high-growth market opportunities.

Challenges:

- Delays in trade execution due to workflow inefficiencies.
 - Errors in manual data reconciliation impacting reporting accuracy.
 - Limited integration of automation tools in current workflows.
-

Workflow Details

Current Trade Execution Process:

Step	Description	Duration
Date Entry	Manual input of trades details into internal systems.	~15 minutes
Cross-system Validation	Manually comparing trade data across two systems to identify discrepancies.	~20 minutes
Trade Approval	Compliance officer manually reviews and approves trades	~25 minutes
Report Generation	Trade summary report is manually created and distributed to stakeholders	~30 minutes

Key Bottlenecks:

- High time consumption for manual data entry and validation.
- Frequent errors in reconciliation due to human intervention.
- Approval delays caused by reliance on manual compliance checks.
